

New German Medicine
Significant Biological Special Programs of Nature (SBS) (Markolin, C. 2010)

Organ or Body Part Affected	Type of Inescapable Conflict/Shock
Adrenal Cortex	Wrong decision conflict (gone in wrong direction or made wrong decision)
Breast Glands (Laterality determines which breast is affected)	Nest-worry conflict (in relation to a child or a spouse depending on laterality)
Bone & Lymph Nodes	Self-devaluation conflict (a loss of self-esteem; feeling worthless or useless) Severe SDC affects bones, less severe SDC affects lymph nodes or muscles and small SDC affects the tendons
Cerebral Cortex	Sexual conflicts (sexual rejection or sexual frustration), Territorial conflicts (fright or scare within our territory; fear of losing our territory)
Cervix	Sexual conflicts (sexual rejection, frustration, abuse, etc.)
Colon, Small intestine & Rectum	Indigestible morsel conflict ("I can't digest or absorb this")
Esophagus	A conflict that one cannot swallow
Frontal Lobe (linked to the lining of the thyroid ducts and pharyngeal ducts)	Frontal-fear conflicts (fear of heading in a dangerous direction)
Hands and Fingers	Dexterity conflict (failure to perform a manual task)
Heart	Territorial loss conflict (loss of home or job or being completely overwhelmed)
Kidney	Abandonment conflict (feeling isolated, excluded or left behind), Refugee conflict (having to flee our home), Existence conflict (life or livelihood at stake), Near-drowning conflict or a Hospitalization conflict
Larynx & Bronchia	Territorial Fear conflict (fear of losing our territory or the actual loss of it)
Liver	Starvation conflict ("I cannot provide for myself, digest or absorb the conflict")
Lung	Death-fear panic conflict triggered by a life-threatening situation or a diagnoses or a prognosis that seems life-threatening
Motor Cortex (controls our muscle movements)	Motor conflicts where we are not able to escape or feel stuck
Neck	Intellectual self-devaluation (failed exam or being put down by someone)
Osteoporosis	Self-devaluation or loss conflict
Ovaries & Testes	Self-devaluation or profound loss conflict (loss of a loved-one or a pet)
Post-sensory Cortex (controls the periosteum or skin that lines the bones)	Separation conflicts that are particularly brutal or severe
Skin	Attack conflicts (physical, verbal, or attack against your integrity)
Spleen	A blood or injury conflict (heavy bleeding or unexpected blood test results)
Stomach & Pancreas	Territorial anger conflict or unexpected announcement of surgery in abdominal area
Thyroid	Conflict of feeling powerless

Uterus/Fallopian Tubes & Prostate	Procreation conflict or ugly conflict with the opposite gender
Visual Cortex (linked to the retina and vitreous body of the eyes)	Conflicts about dangers that threaten from behind
